

Robert Davies
Director of Engineering, Manchester, N.H.

Robert Davies is director of engineering for Intervala's Manchester, N.H., manufacturing operation. In this role, he is responsible for all aspects of the company's design, quality, test and new product introduction areas. Rob has more than 25 years of professional engineering experience in the electrical, electronic and technology manufacturing space across a variety of industries.

Rob joined Intervala in 2023 from Vicor Power Systems, the leader in high-performance power modules, where he served as senior manufacturing engineering manager. Prior to Vicor, he was employed as senior manufacturing process engineer with Mercury Systems, Inc.

During his accomplished career, Rob has worked in a variety of senior engineering and engineering leadership positions with EPE Corporation, Sanmina Corporation, Celestica, Inc. and Flextronics International, Ltd. He holds a Six Sigma black belt from Worcester Polytechnic Institute.
